1. Claims 1-6, 9-13, 15-19, 21-23, 25, 28-32, 35-36, 39 & 44-51 are allowable over prior art of record. Considering claim 1, Schulteiss (col. 8, lines 47-60) teaches the claimed feature of a computerized method for scheduled caching of in-band data broadcast in a channel comprising, a real-time scheduling process and a user initiated scheduling process operable to provide an interface for a user of a receiver for receiving the in-band data broadcast in the channel to determine a user selection of a broadcast channel for delivery of an EPG in the in-band data broadcast, emphasis added.

In particular Schulteiss, discloses an interface for a user to designate the transmission medium to receive a program guide, such as cable, satellite or over-the-air broadcast. However, the reference does not teach the additionally claimed feature of a user interface for the user to select the *scheduled* broadcast time, in the future to receive the instant EPG. Other prior art of record provide the well-known technique of the user selecting the broadcast time to receive a VOD movie, which is different from the claimed electronic program guide. Independent claims 9, 15, 16, 21, 25, 32 & 36, recite comparable subject matter and are thus, likewise treated.

Claims 2-6, 10-13, 17-19, 22-23, 28-31, 35, 39 & 44-51, depend directly or indirectly from allowable independent claims and are therefore, likewise allowable.
